プロフィール　**Profile**

自己紹介/Self-introduction

I'm a postdoc working mostly on developing and improving technological lie detection methods.

研究分野について/About study field

Revealing deception can prevent extreme costs in scenarios such as counterterrorism, high-stakes criminal proceedings, or espionage.

視聴者へのメッセージ　**Message to viewers**

In the research project I will present, we are going to test whether measuring simple response times can be as effective for catching liars (more precisely: detecting concealed information details) as the complicated polygraph-based method used by the police in Japan.
