(*)The number of examinees for Japanese as a Foreign Language includes those who are exempt from part of sections of Japanese as a Foreign Language (listening and listening-reading, reading, writing) due to the testing accommodations.

The Average Score, Highest Score, Lowest Score and Standard Dev. of the respective sections of Japanese as a Foreign Language (listening and listening-reading, reading, writing) were calculated by using the scores of actual examinees in respective sections.

The figures indicated in "Total" of Japanese as a Foreign Language represent the aggregation of respective scores obtained by actual examinees who took "listening and listening-reading" and "reading" and excludes those scores of the examinees who were exempt from part of the sections due to the testing accommodations.

Score Distribution

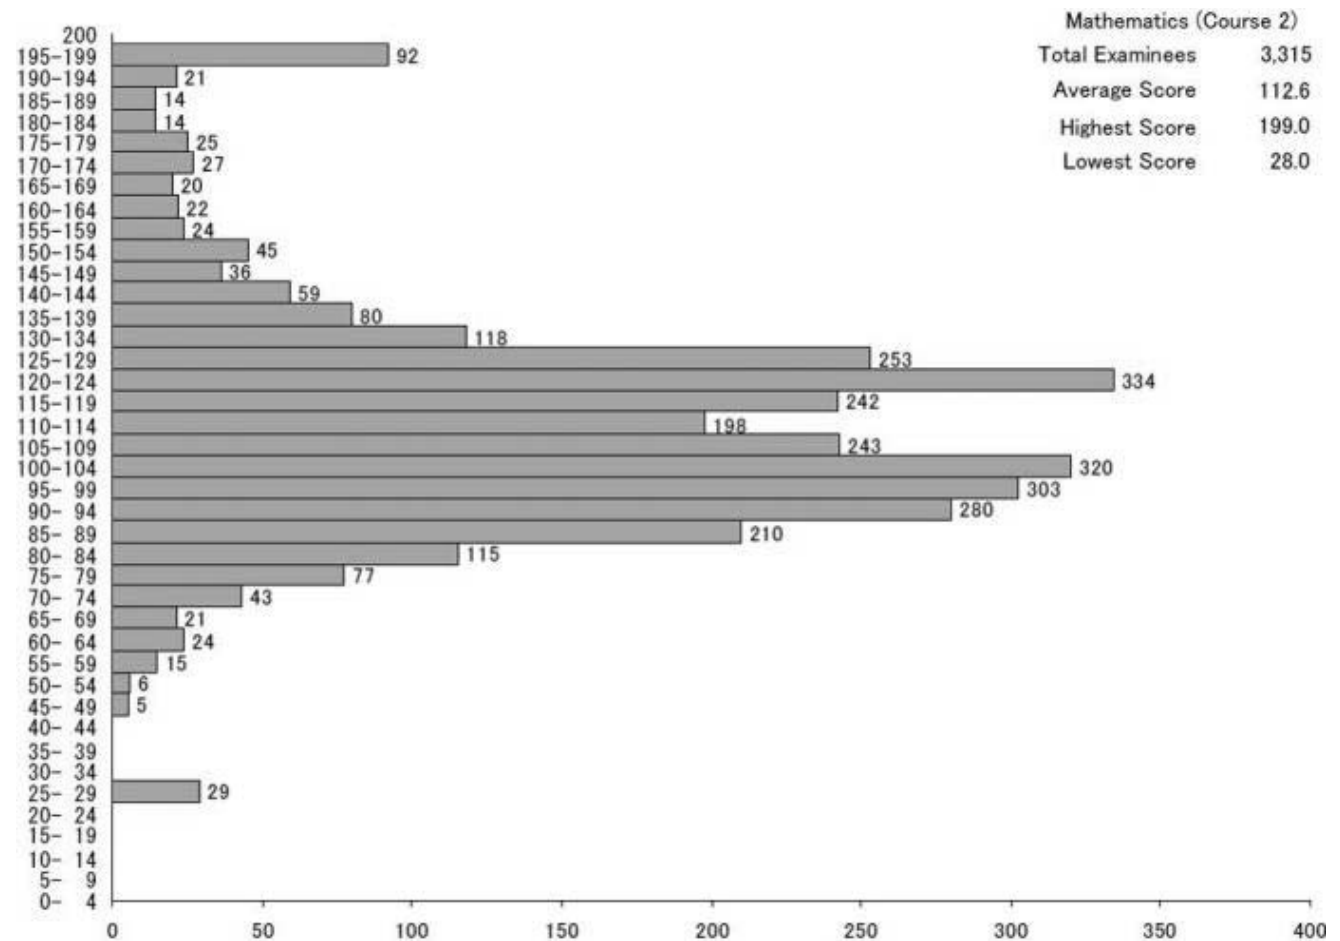

Japanese as a Foreign Language

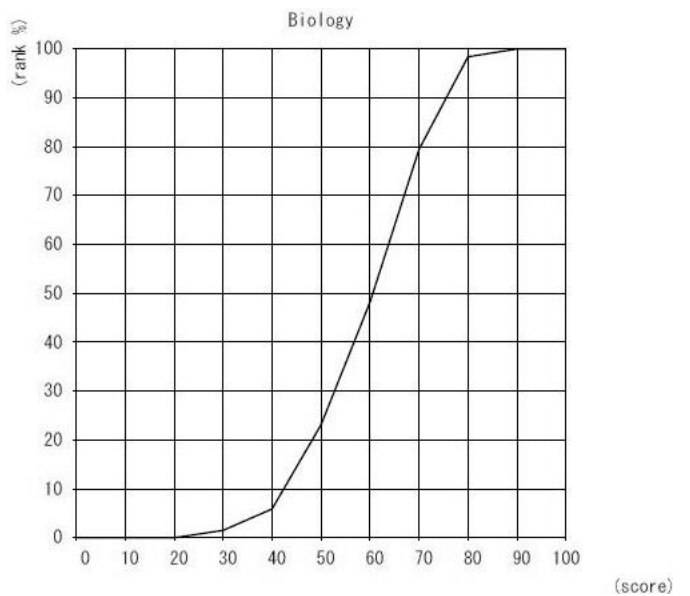

* The table listed above indicates the number of examinees who took the sections of "listening and listening-reading" and "reading", without the number of examinees who were exempt from having part of sections by testing accommodations.

Cumulative Distribution of Scaled Score

The cumulative distribution of the total score displayed above indicates at which position the score achieved by an examinee stands in the total rankings.

Taking the example of an examinee whose total score is 240 from the two fields of the test of Japanese as a Foreign Language, "240" on the horizontal axis corresponds to "70%" on the vertical axis (ranking). This means that the number of examinees who are below this examinee occupies 70 % of the total examinees. Therefore, the percentile rank of this examinee is "70".

The percentile ranking allows you to relatively compare your score, i.e. showing the position of the examinee in the entire group who took the examination.
