

Tohoku University

Research advisor / Center for Northeast Asian Studies Professor SATO Motoyuki
Former international student / Dr. Lu Qi (China)

◆Profile (Former international student)◆

Nationality: China

Educational Background in Japan:

April 2000 – September 2000

Graduate School of Engineering

Tohoku University (Research Student)

October 2000 – September 2002

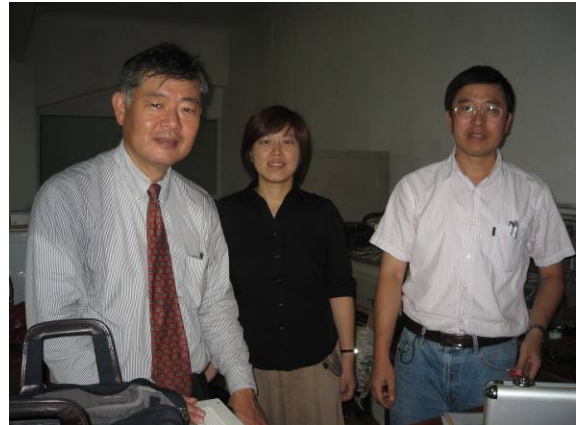

Graduate School of Engineering,

Tohoku University (Master)

October 2002 – September 2005

Graduate School of Environmental Studies

Tohoku University (Doctor)

Laboratory training
Professor Sato (left) and
Dr. Lu Qi (middle)

Present Institution / Status:

Jilin University / Associate professor

◆Follow-up Research Fellowship◆

Period: September 3, 2009 – September 11, 2009 (9 days)

Institution: Jilin University

Field of Research Guidance: GPR technology for Environmental Studies

◆Research advisor's Impressions for the former International student while studying in Japan◆

Dr. Lu Qi has obtained MSc and PhD under my supervision at Tohoku University. She worked hard on her topics, Applications of Ground Penetrating Radar to Environmental Studies, and not only her own research subjects, but also attended many practical research projects, including many fields survey. Throughout these active research activities, she has met and collaborated many researchers and colleagues in Japan. She also jointed our special lectures in elementary schools.

◆Communication after studying in Japan◆

Prof. Sato visited Jilin University in September 2007, and gave intensive lectures to graduate students on GPR applications, and also gave specialized seminars for researchers. At the same time, he conducted research discussions with his former students (2 professors, and 2 associate professors) on instruction methods and their own research topics. Prof. Sato has close contact with Dr. Lu for preparing publications in international journals after she came back to China.

◆Further Cooperation and Communication◆

We are planning researches on application of GPR to environmental problems in Jilin Province, China, which include: oil explorations, river environment managements and volcanology. We continue to plan research plans.

◆Further Cooperation between institutions◆

Tohoku University and Jilin University has academic exchange agreements. Based on this agreement, Center for Northeast Asian Studies, Tohoku University and Northeast Asian Studies Center, Jilin University will start collaborative research works, and prepare some programs before the visit of the president of Jilin University to Tohoku University in November 2009.

◆Impression of this program by Former International student◆

The students who go back homeland and work as a researcher after they graduate from the Universities in Japan, often have many problem in their work and studies. At this moment, if they can obtain the guidance and assistance from their supervisor, it will be very helpful. This Project gives a good chance to keep the contact between the supervisor and the student. It will not only be helpful to the students themselves, but also to the communication and cooperation of two institutes.
