<実施内容>

本事業は、年間を通して留学生と日本の小学生たちとの交流を推進するものである。近年、子どもの「貧困の二極化」が「教育外教育体験の二極化」を生んでいることが問題視されている。本事業は、国際教育の進んでいる韓国の取り組み（児童と留学生が協同で活動する国際交流会）に倣って、年間を通して留学生と国際交流できる体験学習の場を子どもたちに保証することで、国際理解教育を推進するものである。

I joint an event which provided a place for international students to communicate with Japanese children. In this event, I played games with Japanese pupils, taught them English. And also learned something from the children. They played games seriously and helped each other. From this event, I find that they are as lovely as the foreigners. The only difference I feel is that they are polite to others. Maybe it is attributed to the local culture. I think that the foreign children should imitate Japanese children's good manners. It is very good that a spring mattress can entertain a person freely and enjoy himself alone. I feel that the children want more events just like this and want to play various games in the event. When we played basketball or soccer, it was amazing that reaching a consensus on the rules was not very difficult for us. I think perhaps sport is an effective way for international understanding. For the internationals, it is not as easy as they are in their hometown to find a place for fun or communication, so I think this kind of event is important in their study lifes in Japan.
